MQP™ - B+-20056-070

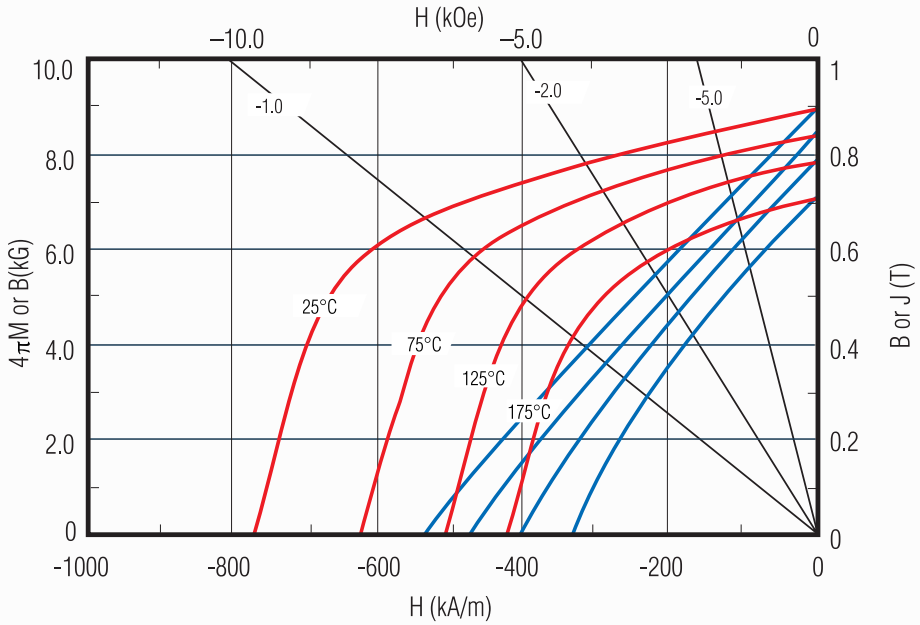
ISOTROPIC POWDER*
Former Name: MQP-B2+

Material Description

MQP-B+-20056-070 is the powder grade for high performance magnets and their applications. Numerous applications, such as power seat motors and smaller sized hard disk drives, could benefit significantly by utilizing MQP-B+-20056-070. It is an isotropic magnet powder suitable for the manufacture of bonded magnets. MQP-B+-20056-070 is based on a patented Nd-Fe-Co-B composition that has been designed to include minimum amounts of cobalt. This material is produced by employing a proprietary rapid solidification process followed by a milling process and heat treatment.

Powder Magnetic Characteristics[1]

		SI		CGS	
Specified	Residual Induction, B_r	893-901	mT	8.93-9.01	kG
	Energy Product, $(BH)_{max}$	122-128	kJ/m³	15.3-16.1	MGOe
	Intrinsic Coercivity, H_{ci}	750-810	kA/m	9.4-10.2	kOe
Typical	Coercive Force, H_c	530	kA/m	6.7	kOe
	Magnetizing Field to >95% Saturation (Min.), H_s	≥1600	kA/m	≥20	kOe
	Temperature coefficient of B_r, α, to 100°C	-0.11	%/°C		
	Temperature coefficient of H_{ci}, ß, to 100°C	-0.35	%/°C		
	Curie Temperature, T_c	330	°C		
	Maximum Operating Temperature[2]	130-150	°C		
	Maximum Process Temperature[3]	250	°C		



Physical Characteristics

Specified

Sieve Screen Analysis:

Total > 40 Mesh (420x420 µm opening..... < 0.1 wt.%
Total > 60 Mesh (250x250 µm opening)..... < 25 wt.%
Total < 270 Mesh (53x53 µm opening) ..... < 12 wt.%

Typical

Density (theoretical) ..... 7.63 g/cm³
Apparent Density ..... 2.64 g/cm³

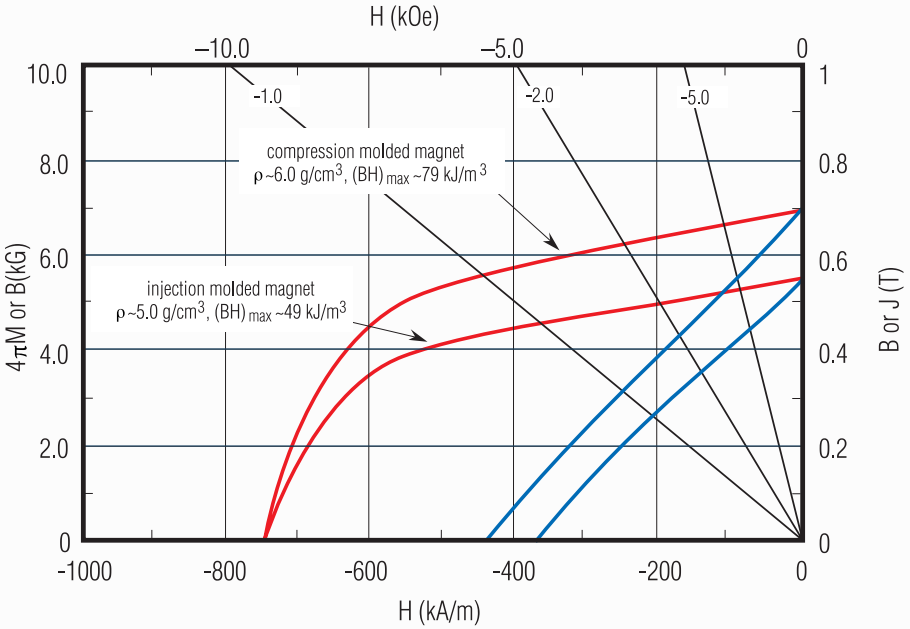
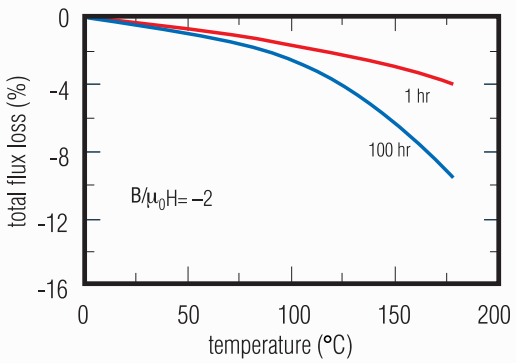
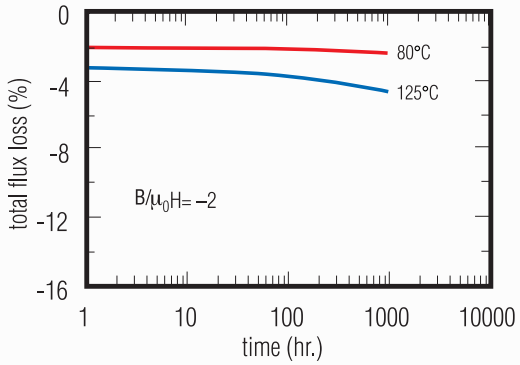
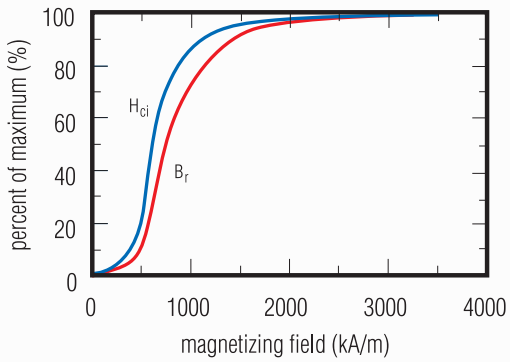
MQP™-B+-20056-070 ISOTROPIC POWDER

Bonded Magnet Characteristics[4]









---

1 Properties measured at 25˚C, unless otherwise specified.
2 The Maximum Operating Temperature for a magnet made from this powder is dependent upon the specific application, the type of magnet, and magnet geometry. Contact your local sales representative for more information.
3 Maximum Process Temperature is defined here as <2% reduction in flux (i.e. structural loss) after heating powder 1 hour in air.
4 These properties are typical at 25˚C and are representative only. Bonded magnet properties are dependent upon powder loading and magnet manufacturing conditions. Contact your local sales representative for information about our products.
