Preferred Partner For The Rare Earth Magnet Industry

Magnequench produces bonded neo magnetic powders, compounds, magnets and assemblies for the automotive, electronics, home appliance, and industrial sectors. Our products enhance magnetic performance and motor efficiency, resulting in reduced motor size and weight. Our diverse, global supply chain options, which include not only our manufacturing and development sites in China, Thailand and UK, but also our global raw material supply base, help us to ensure business continuity and uninterrupted supply.

Assemblies For Automotive Accessory Motors

Understanding the unique needs of the automotive industry, we leverage our extensive industry experience to meet your needs for uninterrupted supply, consistent quality and innovative design, delivering magnetic solutions that meet rigorous standards. In line with our passion for innovation, we are excited to introduce our latest press-fit motor assembly, created for a leading supplier in the automotive industry.

This assembly features the innovative use of our MQ1™ compression molded magnet, which is pressed directly inside the pole housing, eliminating the need for glue. This enables precise component integration, resulting in a motor assembly that is quieter and more durable. Eliminating glue in the assembly process also effectively reduces the air gap, improving motor performance significantly, and improves its sustainability.
