Diverse Supply Chain Options For The Magnetics Industry

Our commitment to supply chain diversity is not just about business continuity; it's about excellence and reliability in delivery. By leveraging a global network of resources – from our suppliers to our manufacturing locations, and our engineering and technology support teams – we ensure that our components are available where and when needed, enhancing operational resiliency across various industries.

MQ1-13™ : Empowering High Performance Assemblies

MQ1-13™ is a high-performance, compression molded NdFeB magnet designed to deliver superior performance in automotive, medical, and consumer electronics applications. These magnets enable engineers to create more compact, lightweight, and powerful motors.

By leveraging MQ's advanced powder and magnetic compound expertise alongside precise process control, the MQ1™ series achieves tight dimensional tolerances. This precision enables the stable production of magnetic rings with large length-to-diameter ratios and thin walls.

This level of precision facilitates more economical and environmentally friendly assembly solutions, such as glue-free component assembly. Magnequench produces +250 million magnets and assemblies annually at its manufacturing sites in China and the UK.

Post Event Feature

Coiltech Deutschland 2025

We are excited to be here for the 2nd year, showcasing our full range of magnetic solutions.

Our European team was on the ground to discuss the specific needs on how our cutting-edge technologies can drive efficiency and performance for our customer's next project. Thank you to all the visitors who stopped by our booth to explore our magnetic solutions and connect with our European team.

Upcoming Events

The 23rd Shenzhen (China) International Small Motor, Electric Machinery & Magnetic Materials Exhibition

8-10 May 2025

Shenzhen World Exhibition & Convention Center

Booth: B092 (36M2)
